REASONS TO LOVE ME

1

Finish first

Craftsmanship is our culture—it's at the heart of everything we do. We're proud that every one of your cabinets are finished by hand, one by one. Our artisan-rendered hand finishing paired with our state-of-the-art finishing technology, creates a flawless finish that you have to see and feel to believe. And we promise it will be just as beautiful in years to come as it is today.

Fit for life

Every door and every drawer are hand fitted one at a time. We insist on a meticulous fit because that's what we're known for. Our philosophy and methodology haven't changed in over 40 years—because you deserve the best.

2

3

Uniquely you

From classic to contemporary to cutting edge and every style in between, we're going to create a new backdrop for your life. Our clients choose custom cabinetry that can transport them to a storybook French country villa or to a modern urban escape. Share your dreams with us, and we will hand craft it into reality for you.

4

Dream in color

Custom color is our most requested finish, and that makes your favorite our specialty. We've perfected the process to deliver your exact choice. Work with your designer, who will assist you with choosing and sending a sample, and we will match a color just for you.

5

More doors to explore

We offer literally hundreds of cabinet door options. And, on our website, we highlight our most popular styles so it's easy for you to find your favorite.

6

Tailored detail

We want you to love your new room so we invite you to make it uniquely yours. To ensure that happens, a Plain & Fancy designer will help you choose options for posts, turnings, corbels, and moldings to create a signature look.

Room to reimagine

Would you like a mudroom with built-in storage? Or an office that's so smartly organized, it's an inspiring place to work? From living rooms to libraries and every nook in between, we can craft custom cabinetry for any space in your home.

8

Built in the USA

Our family-owned company has been hand crafting cabinetry in the heart of Pennsylvania Dutch Country for more than 45 years. Though we've grown from a company that started in a garage to a 250,000-square-foot manufacturing facility, our commitment to quality has never changed.

The craft of construction

With time-tested construction methods, Pennsylvania craftsmen bring your designs to life the old-fashioned way—one cabinet at a time—with mortise and tenon joinery, dovetailed drawer boxes, and fine furniture-making methodology.

9

Grown for greatness

Companies from all over the globe source their furniture-grade woods from Pennsylvania's countryside. That means the world's finest hardwoods are right in our backyard. Our wood and veneers are hand selected for color, premium grade, and consistent appearance to ensure you're getting the highest quality for the best value.

On time, every time

When you love your cabinets, the last thing you want to do is to wait. That's why we barcode your job and place it into our master scheduling system. Everything is scheduled and managed for on-time delivery.

11

Made to love for life

You should enjoy your cabinetry for as long as you own your home. And we guarantee that you can. All you have to do is register online to secure your cabinetry warranty.

13

Just the right light

From dimmable options to an under cabinet glow, lighting adds depth and drama to your room. We offer the latest trends and technology so you can illuminate your space your way. All our factory-installed lights are LED, which makes them efficient and long lasting.

14

The little big things

Shouldn't function be wrapped in style? A well-organized space is a beautiful thing. That's why you can choose from leading-edge storage solutions. Our European hardware optimizes every cabinet for storage and access. From organizing cutlery, dry goods, and cookware to small appliances and recycling solutions, these stunning accessories can create up to 30% more storage capacity and 100% more happiness.

15

Notable unnoticeables

With cabinet floors flush to the front frame, cleaning is quick and sliding dishes in and out is a breeze. Our cabinets are built to be perfectly square and tops on drawers make them virtually jam proof. And the finished product is always gorgeous!

16

Beautifully complete

We invite you to create designer ends on your cabinetry with nonworking doors or beautiful beaded panels—so your piece is stunning from every side. And all drawers feature full extension and a whisper-quiet soft close. No detail is overlooked.

CHOOSE ME

OVER 100 CHOICES AND COUNTING
 Whether you prefer a clean and sophisticated look or lean more toward a casual style with a slight French flair, your Plain & Fancy designer will make the experience one you'll love as much as the end product.

RELY ON ME

Plain & Fancy is a devoted steward of the earth because we live here, too. We improve our green initiatives by reducing material waste, increasing recycling efforts, lowering energy requirements and minimizing pollutants. We also only partner with environmentally responsible vendors who, like us, are committed to giving back. It's why we support the local historic society and our first responders. And it's why our employees are fund raisers for local charities and coaches in local schools. We're proud to serve the communities we call home.
